

## SPbPU at the “Education and Profession 2024” exhibition

From April 17 to 20, Polytechnic University took part in the 25th International Exhibition «Education and Profession 2024», which was held in different cities of Uzbekistan. SPbPU representatives participated in exhibitions in Tashkent and Samarkand.

Over 1500 potential applicants from Uzbekistan visited the SPbPU stand over two days. The participants were mostly high school students, who were actively interested in the possibilities of enrolling in Russian universities. Among the visitors of the Polytechnic’s stand, the most popular fields of study were IT, construction and architecture, mechanical engineering and power engineering, design, management and linguistics. Our experts provided assistance to schoolchildren and their parents: they answered questions and helped to choose suitable educational programs.

Foreign applicants not only received detailed consultations on the opportunities for admission to Polytechnic, but also learned about the experience of foreign students, the culture and traditions of the university. Thanks to this approach, it was possible to attract a significant number of interested applicants who wished to study at SPbPU.
